

Technical Information

OPTAL LP 43

Description	Water based dispersion adhesive.	
Field of use	Labelling Labelling of plastic materials such as PVC, PET and non-flamed PE / PP pots.	
Product specification		Method
pH	8 ± 0,7	ISO 976
Viscosity	20 °C 60.000 ± 10.000 mPa.s (Brookfield20RPM/23 ° C)	ISO 2555
Product characteristics		
Colour	Ivory	
Working temperature	18 - 25 °C	
Application	Should the product be used on pump-fed machines, it is also suitable for the application of lacquered or varnished heavy labels. Notes: Because of the different materials available and the treatments used for the different types of pots, a preliminar adhesion test would be suggested.	
Packaging	30 kg buckets	
Storage	9 months in tightly closed pails stored protected from frost.
