

Sustainability at Henkel Graphic Arts

For more than 130 years, Henkel has worked toward achieving sustainable development. Sustainability is part of our DNA. Through our brands and technologies, and as an employer, we work to meet the needs of people today without compromising the development opportunities of future generations. **We express the essence of this ambition as quality and responsibility.**

In challenging economic times, it is more important than ever to understand that sustainable development is an opportunity. Developing sustainability also involves going through a process of change. **Henkel, your partner in sustainable growth.**

Concept of Sustainability

at Henkel Graphic Arts: Balancing economical, environmental and social aspects

Henkel – Your Partner in Sustainable Growth

Environmental Responsibility

Reduction in Emissions

Purmelt® MicroEmission contains < 0,1% monomeric isocyanate that reduces vapor emissions during processing to a minimum.

Reduction in Waste and Energy Consumption

Lower application temperature of the Technomelt® Cool product range ensures minimum energy used in binding process.

Renewable Resources, Recycling Products

Mirafoil® is 100 % recyclable with a fully sustainable lifecycle.

Social Responsibility

Health and Safety Performance

Henkel has introduced the Technomelt® Cool product range for health and safety of employees, customers and consumers.

Products that grow Business

Effective design communicates a message. Mirafoil® and Miracure® specialty coatings bring to the design ideas unique visual and textured effects that will move the audience beyond the look and into the feel.

Transparency with Stakeholders and improved Quality of Life

Lower emission Purmelt® MicroEmission was extensively tested at machine and application equipment partners allowing for introduction of a proven sustainable PUR adhesive directly into the market.
